

A VERSATILE COMBINATION SPREADER THAT CAN SPREAD MANY MATERIALS

Bulk Material Spreader

20 Ton Series: 2020 and 2020XL

Our largest and most durable bulk material spreader

More versatile Legendary reliability Tougher than ever

For growers or custom applicators who can't micro-manage their hired help, the BMS-20 ton series are large capacity spreaders that are designed for work!

The BMS-2020 is sized for 20 tons of stockpiled ag lime. Unlike most combination litter/lime spreaders where you have to worry about overloading the suspension, the BMS-2020 is designed to be fully loaded with stockpiled lime.

The BMS-2020XL is for the grower that primarily spreads lighter bulkier materials. The 700 cu. ft. hopper can handle 20 tons of beet lime or poultry litter with ease, but is still configured with the steep side slopes and drop pan combination designed to prevent bridging for a 20 ton load of stockpiled lime.

Corner pockets for sideboards are available for increased capacity on both models. They can even be fitted with a fertilizer package allowing low rate application for the ultimate in versatility.

Standard features

- Two twin pinion gearboxes and hardened conveyor drive shaft double the breakout power for heavy loads of damp stockpiled lime
- Upgraded super-duty walking beam suspension and tubular frame handles 20 tons of payload with ease
- Unibody, fully welded design to resist torsional stresses prolonging the life of the spreader
- Oversized oil tank eliminates the need for oil coolers
- Top-driven, dual hydraulic spinners keeps the motors out of the product flow for longer trouble free service
- Stoltzfus' standard 30" wide conveyor and 53° hopper side slope to provide the best combination of material flow and capacity
- Self-contained PTO hydraulics to reduce the strain on your tractor's hydraulic system
- Spreads lime, compost, poultry litter and similar materials with ease

"I know there are a lot of litter spreaders out there, but when you have one that's built like a tank and is doing the job, why look? It has a great spread pattern and I get good service too."

— Randy, Veedersburg, IN

Discover the Stoltzfus Difference

The Stoltzfus BMS-20 Ton Series comes standard with a heavy-duty walking beam suspension eliminating spindle stress caused by torsion axles.

Upgrade to Variable Rate Technology for better utilization of valuable nutrient inputs.

Self-contained PTO hydraulics reduces the strain on your tractor's hydraulic system

Steep, 53° hopper side slopes for enhanced material flow

Unibody, fully welded design prolongs the life of the spreader

Spinner motors mounted out of the flow of corrosive materials for increased life

Double gearboxes and hardened conveyor drive shaft double the breakout power for heavy loads of damp, stockpiled lime

Popular options

- Fertilizer kit for rates down to 200 lbs/acre
- Plug-to-Tractor hydraulics
- Hydraulic rear gate w/ indicator
- Variable Rate Ready (compatible with your Raven controller)
- Corner pockets (for sideboards)
- Lights
- Roll top tarp
- Brakes
- Cor-Ten® HSLA steel hopper
- 304 Stainless steel hopper
- Shredder (breaks up large clumps before they hit the spinners)

Shredder to chop up clumps and give a smoother flow of material onto the spinners

Variable Rate Ready option (compatible with your Raven controller).
